

Muhammad Hammad

Results driven **Full Stack Developer** with **4+ years** of experience in web development, passionate about collaborative team work, project ownership, and staying up-to-date with new technologies.

WORK EXPERIENCE

Human Appeal UK

Global (Hybrid)

Web Developer

SEP 2024 - May 2026

- Design, develop and maintain Human Appeal's suite of websites while using Umbraco CMS and Salesforce as a CRM, ensuring efficient, testable, and well-structured code.
- Collaborate with cross-functional teams (development, communications) to deliver website features and weekly testing (UAT, performance, SEO, security).
- Through targeted development initiatives, improved performance and user experience, resulting in a 25% increase in online engagement.
- Achieved 99.99% website uptime during my tenure, ensuring seamless user experience and minimal downtime.

XS Tech Software Solutions

Pakistan, Islamabad (Hybrid)

MERN Stack Developer

JUNE 2023 - MAY 2024

- Successfully launched MERN Stack web apps tailored for Automotive clients.
- Developed and integrated new features and APIs, leveraging Postman for verification and speed enhancement to improve the functionality.
- Contributed to developing and maintaining critical services, notably for Sherwin Williams' Formula Express project where innovative solutions were required.

XS Tech Software Solutions

Pakistan, Islamabad (On-Site)

Jr. React Developer

JAN 2022 - MAY 2023

- Built engaging interfaces using React Hooks, Redux, and libraries like Ant Design, Material UI, and Bootstrap.
- Optimized frontend components to ensure fast load times and cross-browser compatibility for data-driven applications.
- Engineered custom, high-conversion layouts using WordPress, Elementor, and specialized WooCommerce hooks

XS Tech Software Solutions

Pakistan, Islamabad (On-Site)

Ecommerce IT Specialist

MAR 2019 - DEC 2021

- Streamlined sales cycles using Shipstation, inventory tools, and automated Order Management systems.
- Scaled WooCommerce and WordPress storefronts by managing technical product listings to maximize SEO visibility.
- Conducted thorough market research & data Scraping to identify emerging trends.

PERSONAL PROJECTS

Gaming-site-sharpshooters

- Developed using MERN Stack along with TailwindCSS.
- GitHub Repository: [Gaming-site-sharpshooters](#).

Alfalah-waqf Hospital Management System (MERN)

- Full-stack web application enabling patients to book appointments, view doctor profiles, and manage medical records. Implemented secure authentication, role-based dashboards (patient/admin).
- CI/CD pipeline with automated testing. Optimized performance reducing API response time from 11s to <3s through image optimization and backend caching.
